International Harvester Oil and Gas Engines

EVERY wise farmer does what he can to save money, time, unnecessary hard work, and to have as pleasant a life as is possible.

Therefore, wise farmers buy International Har-

Therefore, wise farmers buy International Harvester engines, engines of standard construction with features like the offset cylinder head, accurately ground piston and rings, extra large valves, detachable valve guides, split-hub fly-wheels—features that make them last by far the longest and save the most money in the end.

Be sure when you buy your engine that it is an I H C engine, and you will be sure of best material and best construction. They are made portable, stationary, or skidded; vertical or horizontal; air or water-cooled. Sizes range from I to 50-H. P. They operate on both low and high grade fuels.

Not every local dealer can show you International Harvester engines. Write us for interesting catalogues and full information, and we will tell you the name of the local dealer who handles our engines.
